PROFESSIONAL SUMMARY

Senior Frontend Engineer with 9+ years of experience designing and delivering enterprise-scale web applications across healthcare, financial services, among several others. Specialize in React, Angular, TypeScript, micro-frontend architectures, and cloud-integrated frontend platforms.

Proven track record modernizing legacy systems, designing scalable UI architectures, developing reusable component frameworks, and delivering business-critical applications supporting large enterprise organizations.

Experienced integrating frontend applications with ASP.NET services, Azure cloud technologies, analytics platforms, and AI-powered workflows.

TECHNICAL SKILLS

Frontend: React, Angular, TypeScript, JavaScript, Next.js, Redux, HTML5, CSS3, Material UI, LitElement

Architecture: Micro-Frontends, Component Libraries, Design Systems, Web Components, Shadow DOM, Accessibility, Performance Optimization

Backend: Node.js, Express.js, ASP.NET, C#, REST APIs

Cloud: Azure App Services, Azure Functions, Azure Storage, Azure DevOps, Azure Cosmos DB (Cassandra API), AWS, GitHub Actions, Jenkins

Databases: SQL Server, PostgreSQL, MongoDB

AI: RAG, LangChain, Google AI Studio, Vercel AI SDK, Vector Databases, Zod

PROFESSIONAL EXPERIENCE

HCA Healthcare | Senior Application Developer (Senior Frontend Engineer) | Apr 2023 – Present

- Designed and delivered enterprise-scale Angular and React applications supporting practitioner competency, regulatory compliance, clinical documentation, and operational reporting across 200+ healthcare facilities.
- Collaborated with architects, product owners, backend engineers, and clinical stakeholders to design scalable frontend architecture and API contracts.
- Architected reusable frontend components, shared modules, standards, and folder structures improving maintainability and delivery speed.
- Integrated Angular and React applications with ASP.NET REST APIs supporting evaluations, compliance workflows, authentication, and reporting.
- Worked with Azure App Services, Azure Functions, Azure Storage, Azure DevOps, and Azure Cosmos DB (Cassandra API).
- Embedded Power BI dashboards providing real-time visibility into compliance and operational readiness.
- Designed configurable workflow engines reducing report generation times by approximately 50%.
- Optimized SQL Server reporting solutions reducing manual reporting effort by approximately 60%.
- Developed React and Node.js solutions for enterprise dialysis log management.
- Performed code reviews, onboarded engineers, mentored junior developers, and contributed to architecture discussions.

Capital One | Software Engineer (Frontend Engineer) | Apr 2021 – Mar 2023

- Owned development of Prequalification, Customer Messaging, and Dealer Portal micro-frontends.
- Built independently deployable micro-frontends using React, TypeScript, and LitElement.
- Developed reusable Web Components using LitElement, Custom Elements, and Shadow DOM.
- Collaborated across engineering teams to integrate micro-frontends into enterprise host containers.
- Optimized Webpack and Rollup build pipelines improving application performance and bundle size.
- Leveraged AWS services including CloudFront, RDS, PostgreSQL, and MongoDB.
- Implemented CI/CD pipelines using Jenkins.
- Applied TDD using Cypress, Jasmine, and Mocha.
- Resolved production issues in a highly regulated financial environment.

Canon USA | Frontend Engineer | Jul 2019 – Jan 2021

- Developed a React-based enterprise inventory and sales planning platform used across business units throughout the United States.
- Partnered directly with stakeholders and planning teams to gather requirements and translate workflows into technical solutions.
- Built reusable React and TypeScript components accelerating feature delivery.
- Implemented drag-and-drop planning workflows and real-time inventory visibility capabilities.
- Integrated Node.js REST APIs and centralized planning data.
- Designed PostgreSQL-backed reporting repositories and analytics capabilities.

EARLY CAREER EXPERIENCE

Web Developer / Full Stack Engineer | 2015 – 2019

- Built Angular and React applications, REST APIs, reporting platforms, and enterprise content management solutions.
- Developed GIS and mapping applications using OpenLayers, PostGIS, and geospatial visualization technologies.
- Contributed to enterprise Drupal and CMS platforms supporting accessibility and content workflows.

FEATURED AI PROJECT

AI Extraction Dashboard – Financial Log Parser

- Built an AI-powered dashboard that converts unstructured financial logs into structured financial data.
- Developed a React 19 and Next.js experience with dynamic dashboards and parsing workflows.
- Integrated Google AI Studio, Vercel AI SDK, and Zod schema validation.
- Designed architecture supporting future RAG and vector-search enhancements.

EDUCATION

Master of Science, Computer Science – Kent State University

Bachelor of Engineering, Computer Science – Visvesvaraya Technological University
